GWAS summary statistics + LD reference

LDpred2-auto

Gibbs sampler with model parameters h^2 , p and α

HapMap3+

An extended set of variants is now available for LDpred2

Prediction

Polygenic scores with individual CIs, and inferred r²

Inference

Estimates with CIs of (local) heritability h², polygenicity p, and strength of selection α

Fine-mapping

Calibrated per-variant p (probabilities of being causal)
